

## Not in the mood: modality and negation in the history of Greek

### 1.2 Philippaki-Warburton and Spyropoulos 2004 = PWS

- Classical Greek
  - Mood fused with person and tense and ∴ expressed in INFL
  - Negators: u:(k) = epistemic, mɛ: = deontic
- Modern Greek
  - Mood is produced within a separate MOOD head
  - Epistemic/deontic distinction, now mapped on the distinction between indicative and subjunctive, is still marked by a choice of the two negators (*den* vs *min*)

### 1.3 Take-away points

1. Deontic vs epistemic is not relevant for discussions of mood or negators in Greek
2. Projection of functional categories does not depend on their morphological properties
3. Negator-choice in Homeric Greek suggests a fine-grained analysis of the functional category of modality

## 2 Continuity

### Theorem PWS 1: The deontic vs epistemic distinction is relevant for the system of mood and negation at all stages of Greek

- Fundamental distinction in field of modality
  - Terms differentiate uses of modal verbs in English
- (1) You must hand in work on time or else = Deontic
- (2) They may be going to India at Easter = Epistemic

#### 2.1 MGk subjunctive = deontic? (examples from Holton *et al.* 1997)

- Negative imperative ✓

(3) Να μην του το δώσεις  
 na min tu to δ'osis  
 NA MIN him.DAT it.ACC give  
 'Do not give it to him'

- Complement clauses ✓

(4) Ο Γιάννης παρακαλούσε να μην τον στείλουνε στο μέτωπο  
 O Jannis parakal'use na min ton st'ilune sto m'etopo  
 The John pleading.PAST NA MIN him send the.ACC front  
 'John was pleading not to be sent to the front'

- Imperatives with *na* ✓

(5) Να ντύνεσαι πιο ζεστά τώρα το χειμώνα  
 na d'unesi pjo zest'a t'ora to xeim'ona  
 NA dress more warm clothes the winter  
 'You should wear warmer clothes now in winter'

- Wishes ✓

(6) Να/ας τον δω κι ας πεθάνω!  
 na/as ton do ki as peθ'ano  
 NA/AS the see.SUBJ.1.SG and AS die.SUBJ.1.SG  
 'May I see him and then I don't mind if I die!'

- After *bori/isos* = possibility ✗

(7) Μπορεί να βρέξει αύριο αλλά μπορεί και να μη βρέξει  
 bor'i na vr'eksi 'avrio all'a bor'i ki na mi vr'eksi  
 may.3.SG NA rain.3.SG tomorrow but may.3.SG also NA MIN rain.3.SG  
 'Maybe it will rain tomorrow but maybe it will not rain'

(8) Ίσως (να) βρέξει αύριο  
 'isos na vr'eksi 'avrio  
 perhaps NA rain.FUT.3.SG tomorrow  
 'Perhaps it will rain tomorrow'

## Not in the mood: modality and negation in the history of Greek

---

- Complement of verbs taking *na* or *oti* ✗

(9) Δε νομίζω να μας καλέσει  
 δε νομ'ίζω να μας καλέσει  
 δε think.1.SG NA us.ACC invite.FUT.3.SG  
 'I don't think that he will invite us'

(10) Νομίζω ότι δε θα μας καλέσει  
 νομ'ίζω 'οτι δε θα μας καλέσει  
 think.1.SG OTI δε FUT us call.FUT.3.SG  
 'I think that he will not invite us'

- Complement of perception verbs ✗

(11) Βλέπω το Γιάννη να σου χαμογελά  
 βλέπω το Γιάννη να σου χαμογελά  
 see.1.SG the John.ACC NA you.DAT smiling.ACC  
 'I see John smiling at you'

- Main clauses - two readings ✗

(12) να εγραψε το γράμμα  
 NA wrote.3.SG the letter  
 'Is it possible/could it be the case that he wrote the letter?'  
 (= epistemic?)  
 'I wish he had written the letter.' (= deontic?)

Roberts & Roussou 2003, 75

### Summary: MGk subjunctive (PWS theorem = deontic)

Negative imperatives	deontic	✓
Most complement clauses after <i>na</i>	deontic	✓
Imperatives after <i>na</i>	deontic	✓
Wishes with <i>as</i>	deontic	✓
Possibility after <i>mpori</i>	epistemic	✗
Some complement clauses after <i>na</i>	? subjunctive	✗
Complement after verbs of perception	?	✗
Main clauses	deontic or epistemic	✗

## 2.2 ClGk moods

- Jussive subjunctive - - deontic?

(13) ἀλλ' ἴωμεν  
 all io:men  
 but go.SUBJ.1.SG  
 'but let's go'  
 Plato *Protagoras* 311 a 2

- Prohibitive subjunctive - - deontic?

(14) μὴ περὶ τοῖς φιλτάτοις κυβεύης τε καὶ κινδυνεύης  
 e: peri tois p<sup>h</sup>iltatois kubeue:s te kai kinduneue:s  
 ME: about the.DAT.PL most-dear.DAT.PL throw-dice.SUBJ.2.SG PTCL and take-risks.SUBJ.2.SG  
 'Don't throw dice about the most important things and take risks'

Plato *Protagoras* 314 a 1

- Wish optative - - deontic?

(15) Εἰ γάρ, ἢ δ' ὅς, ὦ Ζεῦ καὶ θεοί, ἐν τούτῳ εἴη·  
 e: gar e: d hos o: Sdeu kai t<sup>h</sup>eoι, en tuto: eie:  
 if PTCL said PTCL he, by Zeus and gods, in that.DAT.SG be.OPT.3.SG  
 'if only, he said, by Zeus and the gods, it could be like that'

Plato *Protagoras* 310 d 9

- Subjunctive in conditional clauses - - epistemic?

(16) ἄν αὐτῷ δίδῳς ἀργύριον καὶ πείθῃς ἐκεῖνον, ποιήσει  
 an auto: dido:s argurion kai peit<sup>h</sup>e:s ekeiron, poie:sei  
 if him.DAT.3.SG give.SUBJ.2.SG silver and persuade.SUBJ.2.SG him, make.FUT.3.SG  
 καὶ σέ σοφόν  
 kai se sop<sup>h</sup>on  
 also you wise  
 'If you give him money and persuade him, he will make you wise too'

Plato *Protagoras* 310 d 8

- Optative in conditional clauses - - epistemic?

(17) ὥς οὐτ' ἄν τῶν ἐμῶν ἐπιλίπομι οὐδὲν οὔτε τῶν  
 ho:s ut an to:n emo:n epilipoimi uden ute to:n  
 thus neither PTCL the.GEN.PL my.GEN.PL spare.OPT.1.SG nothing neither the.GEN.PL  
 φίλων·  
 p<sup>h</sup>ilo:n  
 friends.GEN.PL  
 'In that case, I would not spare any of my own possessions, nor any belonging to my friends'

Plato *Protagoras* 310 e 1

### Summary: ClGk moods

Jussive subjunctive	deontic?
Prohibitive subjunctive	deontic?
Wish optative	deontic?
Subjunctive in conditional clauses	epistemic?
Optative in conditional clauses	epistemic?

### Continuity Moods Conclusion

- Classical Greek
  - All ‘deontic’ uses are ‘performative’
    - \* Status of performative/illocutionary uses controversial
    - \* Certainly different from deontic uses of modal verbs in English
  - Most ‘epistemic’ uses are in conditional clauses - not clear that this is epistemic modality (see Willmott 2008)

(18) ?If Fran may be leaving , she will miss the talk.

**Deontic vs epistemic distinction does not in fact appear useful for distinguishing the uses of the moods in Classical Greek (for more detail see Willmott 2007)**

- Modern Greek
  - Subjunctive vs indicative  $\neq$  deontic vs epistemic**

### 2.3 MGk Negators (PWS theorem: $\mu\text{in}$ = deontic, $\delta\text{en}$ = epistemic)

- $\mu\text{in}$ : in *na* clauses and in negative imperatives
- $\delta\text{en}$ : elsewhere

#### Problems

1. *na* clauses not all ‘deontic’
2.  $\delta\text{en}$  in conditional clauses - not ‘epistemic’
3.  $\mu\text{in}$  in gerunds - not ‘deontic’

(19)  $\mu\text{in}$  γνoρίζοντας το πρόβλημα, αποφάσισε να μείνει  
min γnorizontas to problima apofasise na mίνει  
not knowing the problem, decided.3.SG NA stay.3.SG  
‘Ignorant of the problem, she decided to stay’

## 2.4 ClGk Negators (PWS theorem: me: = deontic, u:(k) = epistemic)

- me: in purpose clause ✓

(20) πολλάκις ἡ γυνὴ ἀπῆρει κάτω καθευδήσουσα ὡς τὸ παιδίον, ἵνα τὸν τιτθὸν  
 pollakis he: gune: ape:ei kato: kat<sup>h</sup>eude:susa ho:s to paidion, hina ton tit<sup>h</sup>on  
 often the wife went down to-sleep with the child, so-that the breast  
 αὐτῷ δίδῳ καὶ μὴ βοᾷ  
 auto: dido: kai me: boa  
 it.DAT.3.SG give.SUBJ.3.SG and ME: shout.SUBJ.3.SG  
 ‘Often my wife would go downstairs to sleep with the child, so that she could feed it,  
 and so that it wouldn’t cry’

Lysias *On the murder of Eratosthenes* 10

- u:(k) in indirect speech ✓

(21) οὐκ ἄρα ἐκεῖνό γε ἀμφισβητοῦσιν, ὡς οὐ τὸν ἀδικοῦντα δεῖ δίδοναι δίκην  
 uk ara ekein<sup>o</sup> ge amp<sup>h</sup>isbe:tusin ho:s u ton adikountan dei didonai dike:n  
 U:K PTCL this PTCL dispute.3.PL, that OU the unjust must.3.SG give.INF penalty  
 ‘They do not dispute that the unjust must not pay the penalty’

'Hang on, you should know something: if you don't let me serve you, then someone else will turn up worse than me.'

Aristophanes *Knights* 949

• *me*: with conditional participles ✗

(26) ἐπεὶ οἶεῖ σύ, ἔφη, Ἄλκησιν ὑπὲρ Ἀδμήτου ἀποθανεῖν ἄν, ... μὴ οἰομένους  
 epei oiei su, ep<sup>h</sup>e:, Alke:sin huper Adme:tu: apot<sup>h</sup>anein an, ... me: oiomenu:s  
 since think you, he-said, Alcestis for Admetus died PART, ... NEG thinking

ἀθάνατον μνήμην ἀρετῆς περὶ ἑαυτῶν ἔσεσθαι  
 at<sup>h</sup>anaton mne:me:n arete:s peri heauto:n esest<sup>h</sup>ai  
 deathless memory valour.GEN for themselves to-be

'Do you suppose, she asked, that Alcestis would have died for Admetus, ... if they had not expected that there would be an undying memory of their valour about them?'

Plato *Symposium* 208d

• *me*: as complement ✗

(27) ὄμνυσιν τὸν Διόνυσον  
 omnusin ton Dionuson  
 swear.3.SG the.ACC Dionysus.ACC

μὴ πώποτ' ἀμείνον' ἔπη τούτων κωμωδικὰ μηδέν' ἀκοῦσαι.  
 me: po:pote ameinon' epe: tu:to:n ko:m:odika me:den aku:sai  
 NEG ever better stories of-them comic NEG hear.INFIN

'he swears by Bacchus, that none ever heard better comic verses.'

Aristophanes *Wasps* 1047

**Summary: ClGk negators (PWS theorem: me:= deontic, u:(k) = epistemic)**

me:		u:(k)	
Purpose clauses	✓	Indirect speech	✓
Directives and wishes	✓	Assertions	✓
me: in conditional sentences	✗		
me: with conditional participles	✗		
me: in certain complements	✗		

**Continuity conclusion**

**Theorem PWS 1: The deontic vs epistemic distinction is relevant for the system of mood and negation at all stages of Greek**

- Arguments against theorem PWS 1
  1. The uses of the subjunctive in MGk are not all ‘deontic’
  2. The uses of the moods in ClGk may not be divided in this way
  3. The uses of the negators in MGk do not correspond
  4. The uses of the negators in ClGk do not correspond
  5. No explanation of how this connection operates

**Conclusion 1: The theorem does not stand**

**3 Change: the WYSIWYG approach**

- Mirror principle (based on Baker 1985): “syntactic structure reveals the morphological structure and vice versa”
- “fused morphology reveals fused/syncretic functional categories and simultaneous checking” (Philippaki-Warburton & Spyropoulos 2004, 794)
- ClGk: mood is expressed inflectionally
- MGk: mood is expressed syntactically, by the modal particle *na*
- **Theorem PWS 2: The two stages of the language must have a radically different syntactic structure**

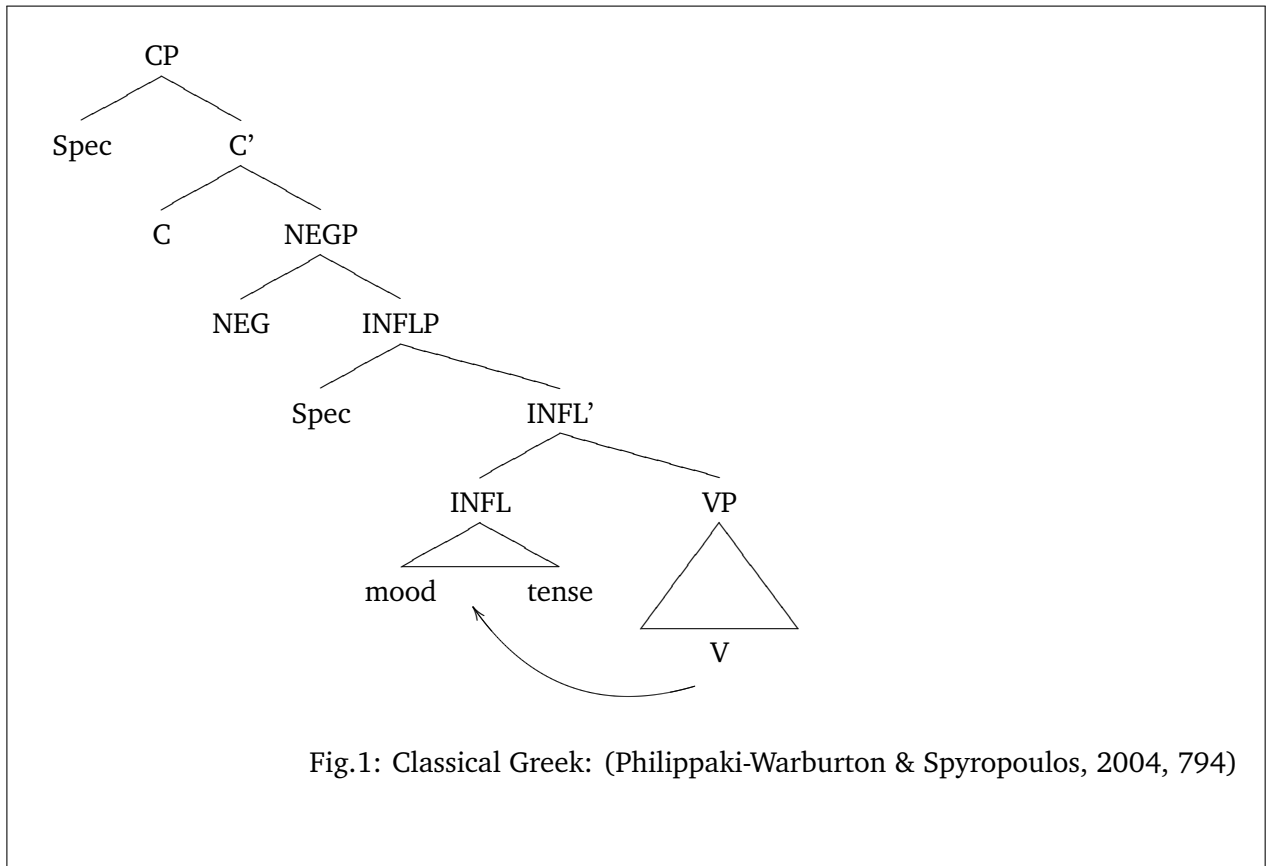

Fig.1: Classical Greek: (Philippaki-Warburton & Spyropoulos, 2004, 794)

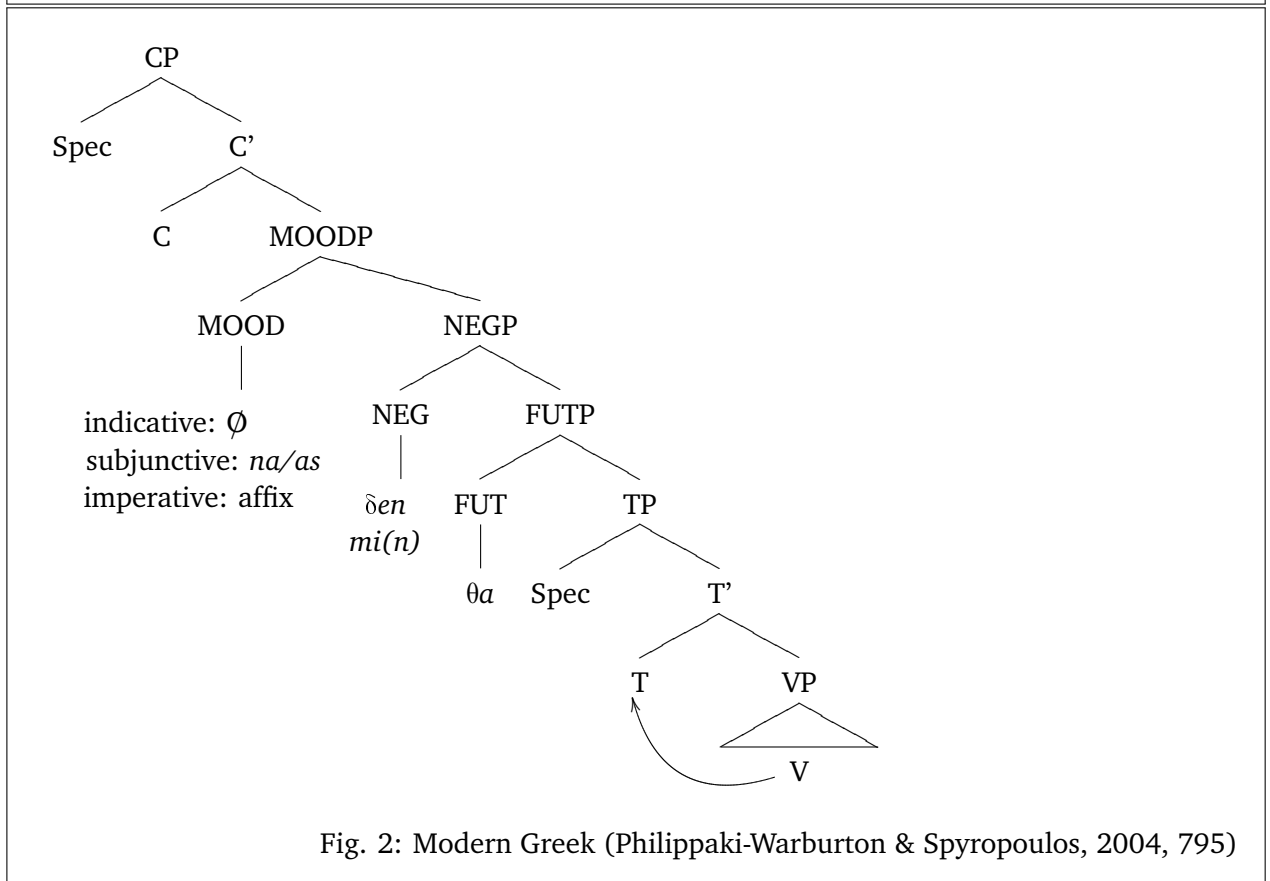

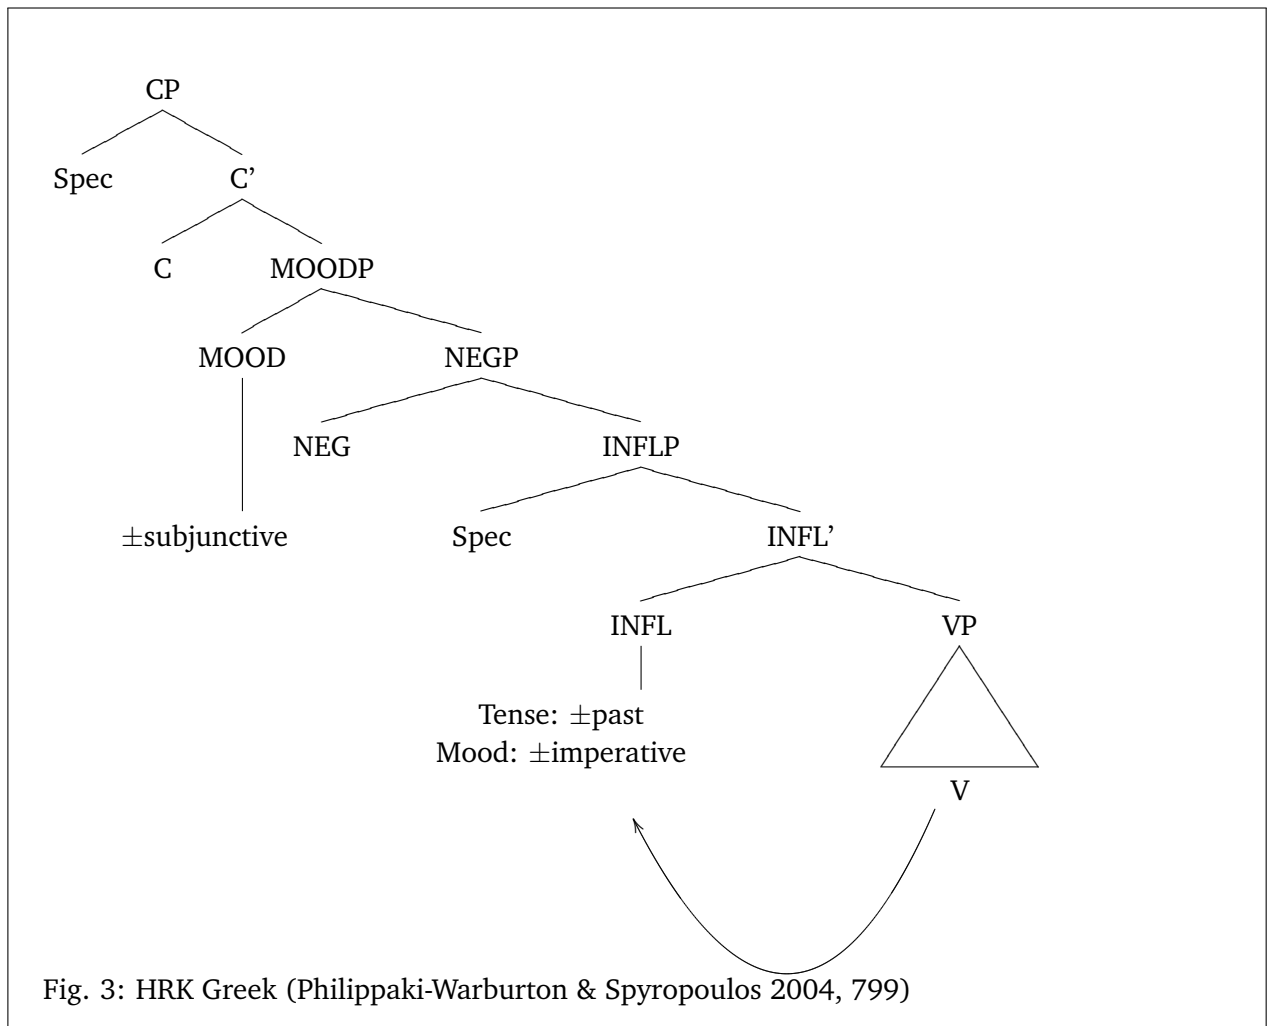

Fig. 2: Modern Greek (Philippaki-Warburton & Spyropoulos, 2004, 795)

- Maps of syntactic structure are not uncontroversial (cf Roussou 2000; Giannakidou 2008)
- Problem: if systems of Classical and Modern Greek are so radically different, at which stage, and under what circumstances did that structure change?
- This suggests “functional heads do not project universally; instead their projection depends on their morphological properties” (Roberts & Roussou 2003, 84) - justified?

### 3.1 HRK Greek: is it the transition period?

- Precursor of *na* = complementiser

(28) οὗτος ἦλθεν εἰς μαρτυρίαν, ἵνα μαρτυρήσῃ περὶ τοῦ φωτός, ἵνα πάντες  
 'utos 'ilt<sup>h</sup>en is marty'rian 'ina marty'risi pe'ri tu p<sup>h</sup>o'tos, 'ina 'pandes  
 This came to witness that he-witness.SUBJ about the light, that all-men  
 πιστεύσωσιν δι' αὐτοῦ.  
 pi'ste'fososin di a'f'tu  
 may-believe through him  
 The same came for a witness, to bear witness of the Light, that all men through him  
 might believe.

John 1.1.7: Horrocks 1997, 94

- *na* = marker of future tense in medieval Greek

(29) ἔάν γάρ μάθω, ἵνα αὐτῷ συντύξω  
e'an gar 'maθo, (i)'na to sin'dixo  
if(ever) for I-learn.SUBJ, PART him I-speak.SUBJ  
'for if I find out, I shall talk to him'.

Lausiac History, llB b: Horrocks 1997, 167

- Distinct inflectional forms of subjunctive til 12th C

(30) Πρὸς ἄριστον, ἔφη, τὸ παρὸν τραπώμεθα·  
'pros 'ariston, 'efi 'to pa'ron tra'pomeθa  
To lunch, he-said, (for)the present let-us-turn.SUBJ;  
For the present let us turn to our lunch;

Alexiad 12.9: Horrocks 1997, 176

### 3.2 General arguments against the claim

- Gradual change in modal system with several factors interacting
- Phonological: indicative and subjunctive become almost indistinguishable
- Onetime conjunctions take on greater role
- Semantic desire for transparency affects decline of optative?
- Change already foreshadowed in Homeric period

### Change conclusion

#### Theorem PWS 2: The syntactic structures of ClGk and MGk are radically different

- Arguments against theorem PWS 2
1. Problem is when and how radical change takes place
  2. HRK not transition period
    - *na* is still complementiser
    - *na* not only found in 'modal' contexts
    - Distinct inflections remain on the written subjunctive
  3. Change is gradual not catastrophic

#### Conclusion 2:

- **Strict reading of the mirror principle is unsupported**
- Accounting for change between modality-poor and modality-rich model is difficult...

## 4 Negators in Homeric Greek

- u:(k) in assertions (*Iliad* 24.300)

(31) ὦ γύναι οὐ μὲν τοι τὸδ' ἐφειμένῃ ἀπιθήσω  
 o: gunai u: men toi tod ep<sup>h</sup>iemene: apit<sup>h</sup>e:so:  
 o lady U: PTCL you.DAT.SG this asking.DAT.SG disobey.FUT.1.SG  
 'O lady, I will not disobey what you ask'

- (45) a. *Gianni è forse già stato qui?*  
 Has G perhaps been here before?  
 b. \**Gianni è probabilmente già stato qui?*  
 Has Gianni probably been here before?

Cinque 1999, 88

- ModP<sub>epistemic</sub> (probabilmente) > MoodP<sub>irrealis</sub> (forse).

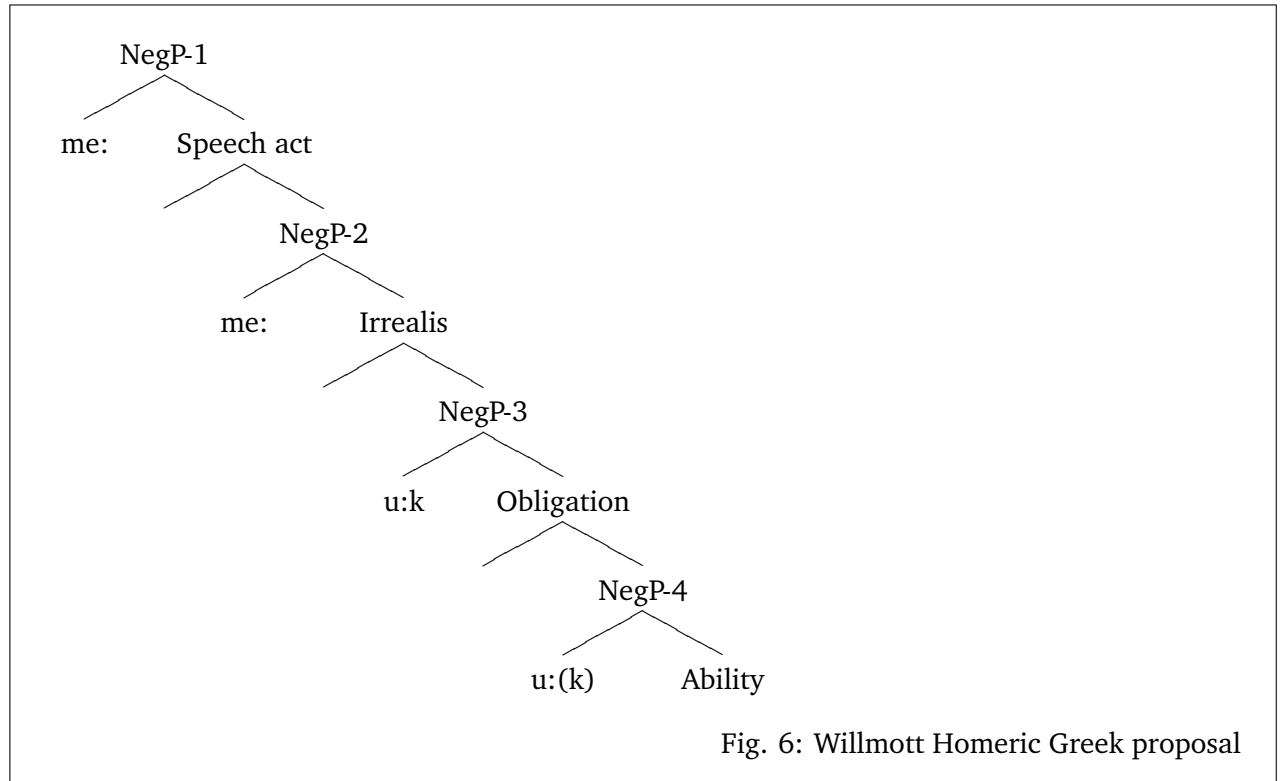

**Summary: Negators in Homeric Greek with types of modality**

Meaning	Negator	Type
Directives	<i>me:</i>	MoodP <sub>speechact</sub>
Wishes	<i>me:</i>	MoodP <sub>speechact</sub>
Oaths	<i>me:</i>	MoodP <sub>speechact</sub>
Most Conditional antecedents	<i>me:</i>	MoodP <sub>irrealis</sub>
Purpose clauses	<i>me:</i>	MoodP <sub>irrealis</sub>
Statements of obligation	<i>u:(k)</i>	ModP <sub>obligation</sub>
Conditional consequents	<i>u:(k)</i>	?
Assertions	<i>u:(k)</i>	VP

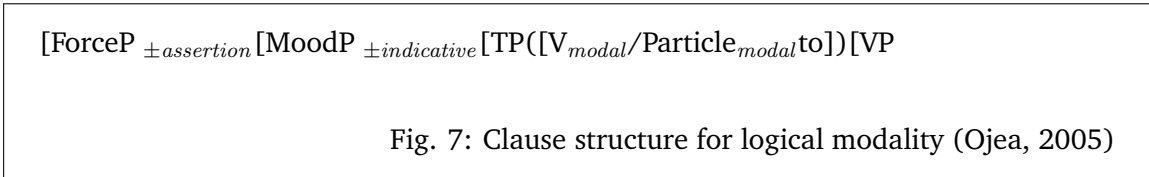

### 4.3 Proposal for Homeric Greek

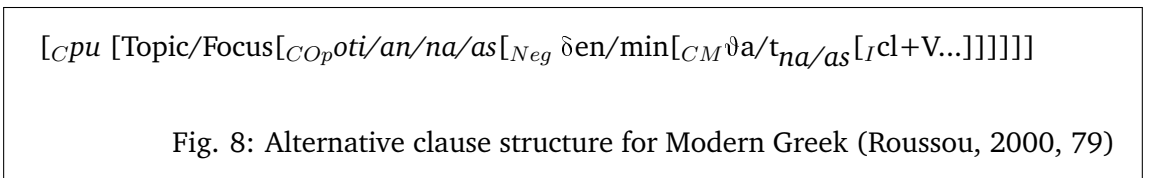

### Discussion

- Number of NegP positions
- Position of negative wrt speech act
- Variance of negator in conditional antecedents
- Accounting for the modality of conditional consequents
- Where does the ‘modal particle’ fit in?
- Relative position of this structure within clause structure

– Compare:

– And:

## Conclusions

- Systems of modality and negation are interestingly intertwined in the history of Greek
- Deontic vs epistemic is not relevant distinction for discussions of mood or negators or their interrelations in Greek
- Projection of functional categories does not depend on their morphological properties: we may not use the WYSIWYG approach to work out the syntactic structure of a language
- Negator-choice in Homeric Greek suggests a fine-grained analysis of the functional category of modality similar to Cinque's model
